## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment received on 10/14/2005 has been reviewed and considered with the following results:

As to the objection to claims 1 and 6, Applicant's amendments have overcome the objection, as such; the objection has been withdrawn.

The prior art rejections to the claims made in the previous Office Action mailed 6/14/2005 are now withdrawn in view of Applicant's amendments. Therefore, the case is found to be in allowance condition for the reasons as set for below.

## **REASON FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or fairly suggest a digital logic system and a method for resetting the digital logic system, as recited in claims 1 and 16, specifically the limitation that the ancillary clock generator for generating an ancillary clock signal independent of the externally generated main clock signal and having short term frequency stability in relation to an expected duration of a system reset phase; and being configured in the specific structural limitations such as a reset input for receiving a reset signal; a clock input for receiving an externally generated main clock signal; at least one functional circuit; a clock selection multiplexer having a first input for receiving the externally generated main clock signal, a second input for receiving the ancillary clock signal, and an output for providing the externally generated main clock signal or the ancillary clock signal to said at least one functional circuit and

a resettable edge-triggered shift register having a first input for receiving the externally generated main clock signal a second input for receiving the reset signal, and an output connected to said clock selection multiplexer for deselecting the ancillary clock signal and selecting the externally generated main clock signal after detecting a certain number of edges of the main clock signal following the reset signal.

Base claims 6 and 11 are allowed for similar reasons; note the above discussion with regard to claims 1 and 16.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
